

Tech Minds®
Consulting

Company Profile

Who we are...

We are a group of passionate technology, agile, and software development consultants, enjoying long and proven track record in managing software development teams and building technology products.

We enjoy teaching and implementing technical best practices, consulting services and support technology projects lifecycle from vision to launching.

We lead organizations into their Agile transformation journey, agile software development, manage complete software development life cycle, including deep experience in software quality management, testing, and test automation.

We understand that each organization is unique, and each engagement is different. We customize our services, methodologies and approach to practically serve our client and achieve tangible results while focusing on what matters most.

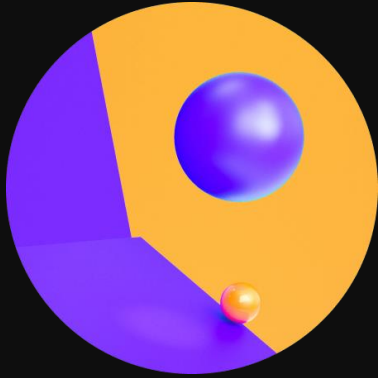

During our years in business, we established several success stories and closed many great projects through establishing and operating several technology teams and startups, developing and implementing technical practices and methodologies for many clients, and supervising the technical practices in several technology projects.

Our know
how

What we do

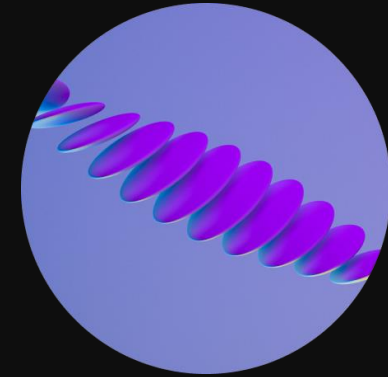

Technology Consulting Services

We cover technology project management, agile transformation, technology startups support, and technical practices implementation.

UI/UX Design Services

We follow established design standards, workflows, and guidelines — you get the product you need, delivered by expert designers within the set timeframe.

Managed Testing Services

An assessment that benchmarks where your organization is today and drives continuous improvement

Consulting Service

- Tech. Startups Support
- Technical Product Audit
- Technical Process Maturity Assessment
- Supervising Software Development Projects
- CTO as a Service
- Software Requirements Analysis and Modelling
- Software Design and Architecture
- UI/UX Design Services
- Software Testing and Test Automation
- Agile Transformation and Agile Practice Audit

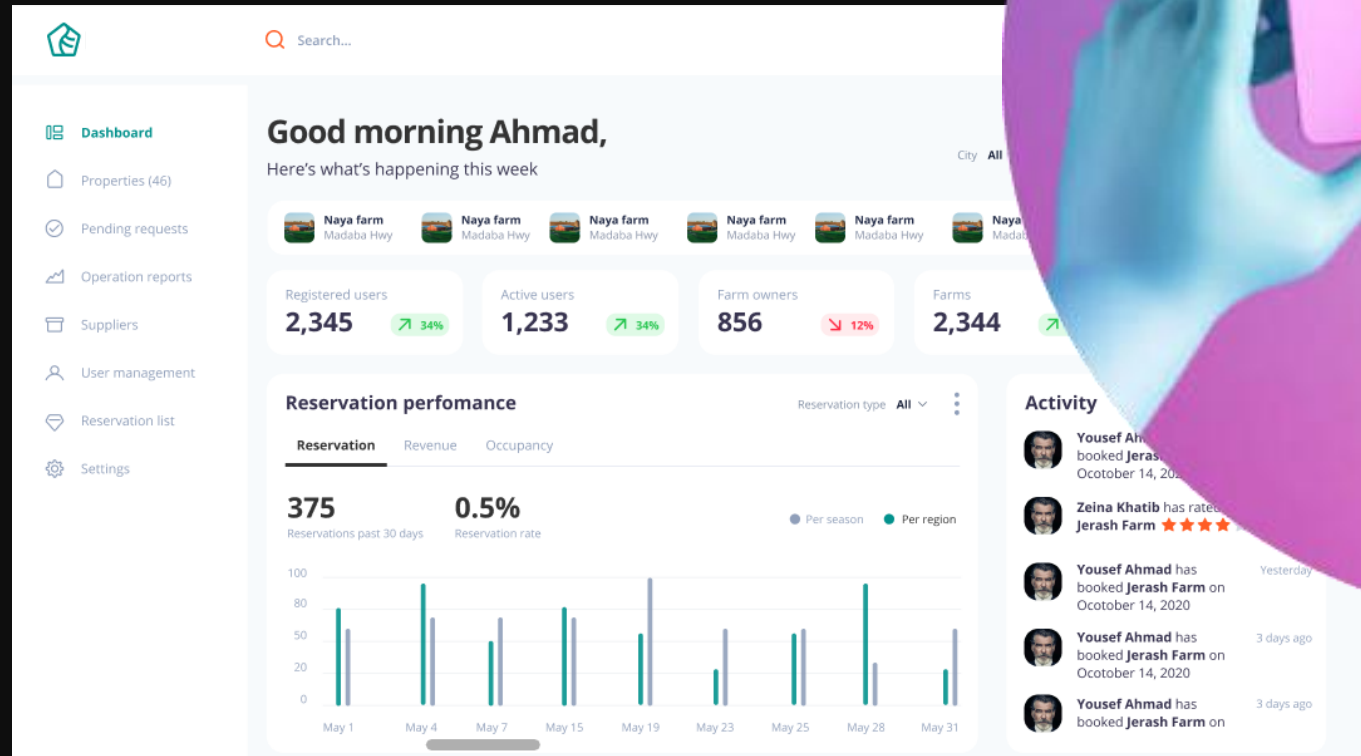

Training and Coaching Service

- PMI-ACP (Agile Certified Practitioner Certification Program).
- IIAB-CBAP (Certified Business Analysis Professional)
- Agile Software Development in Practice
- Software Testing and Quality Management Program

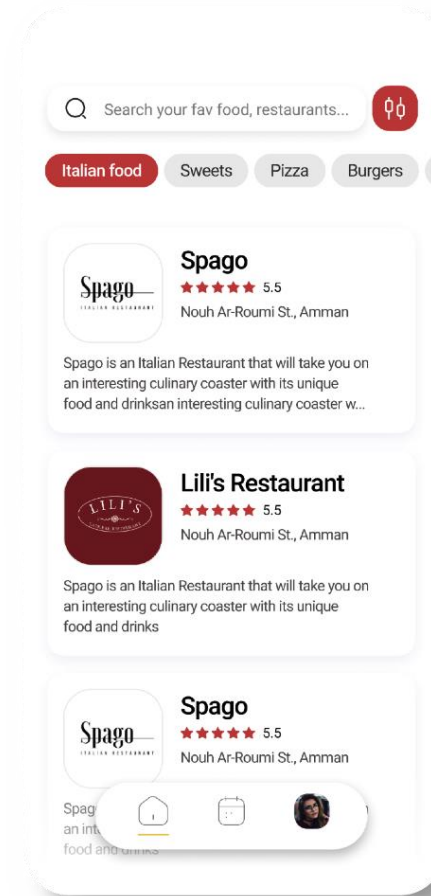

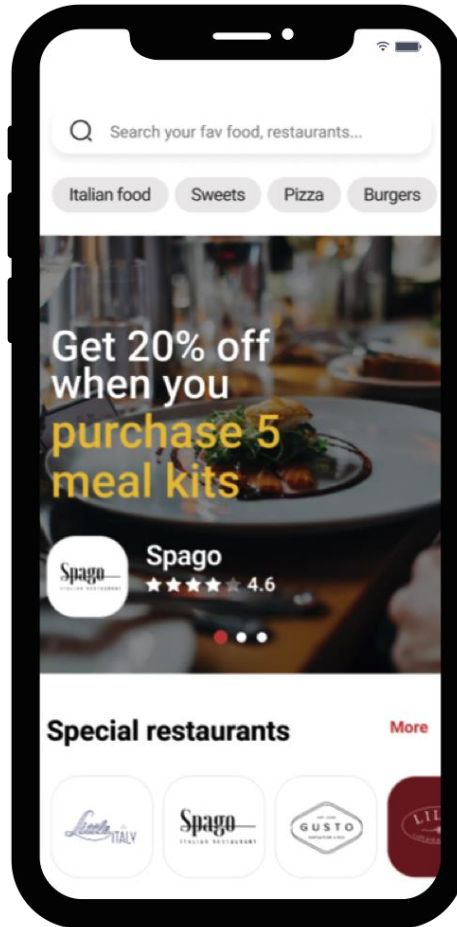

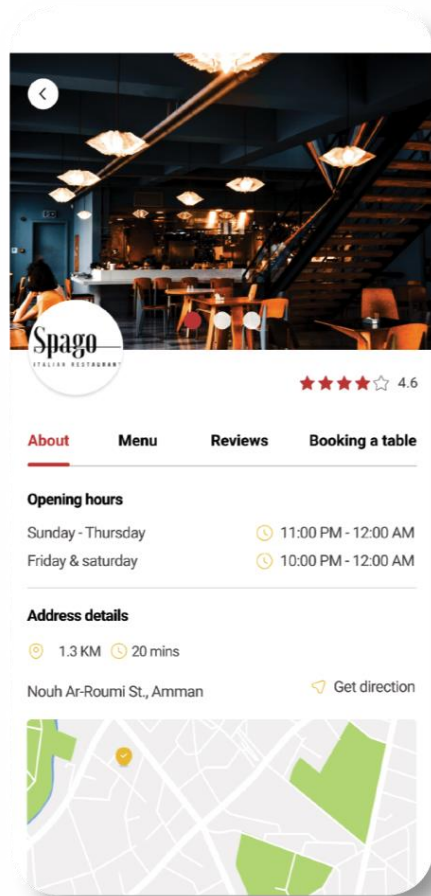

UI/UX Design Services

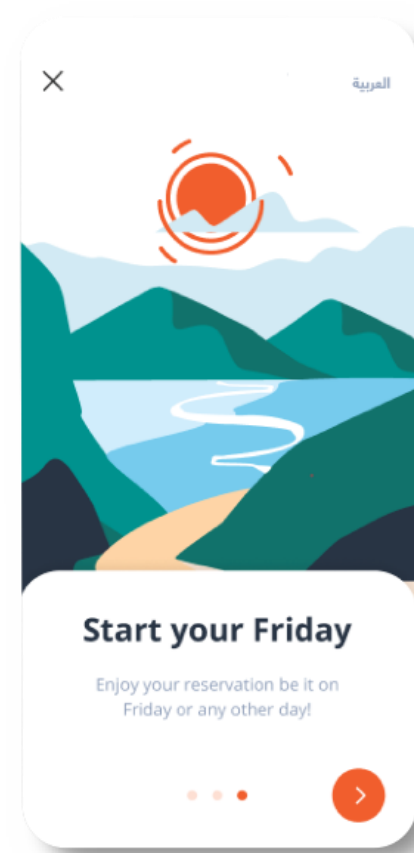

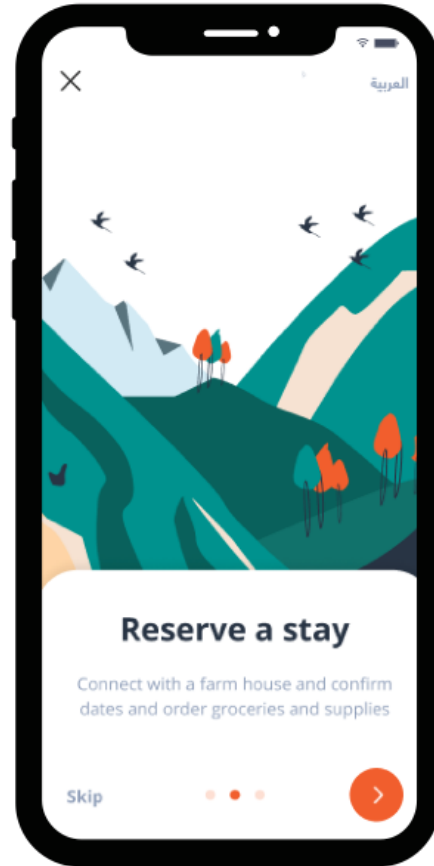

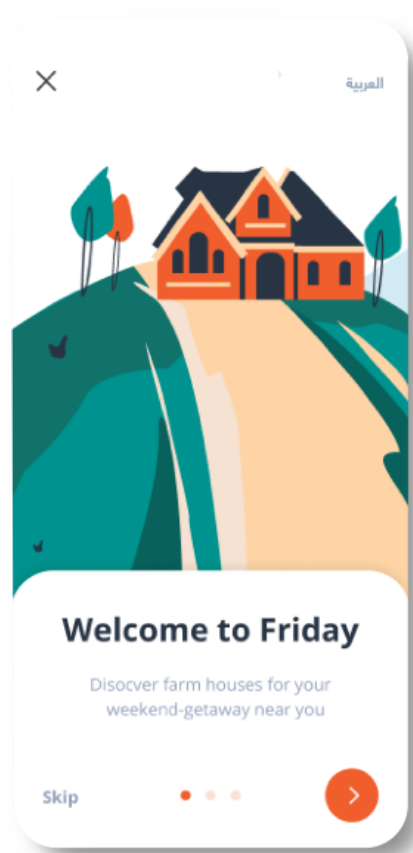

- We follow established design standards, workflows, and guidelines to convert ideas into concrete design specification.

Managed Testing Services

- We provide managed and supervised outsourced testing services that comply with software testing best practices.

Software Testing

The screenshot displays a software testing dashboard for a User Acceptance Test (UAT) cycle. The main section shows a pie chart and summary statistics for the test run 'UAT - Cycle 3 - Android App - Integrated Environments'. The results are as follows:

Category	Count	Percentage
Passed	5	38%
Failed	7	54%
Not Covered	1	8%
Blocked	0	0%
Retest	0	0%

Below the pie chart, a horizontal bar chart shows the overall progress, with 38% completed (green) and 62% remaining (red and grey). A note indicates '0 / 13 untested (0%)'. The dashboard also includes a navigation menu, a search bar, and a sidebar with a tree view of test cases.

UAT - Cycle 3 - Android App - Integrated Environments

Created by CIPS-QA. Belongs to milestone [Android v1.1.12.7831708](#).

Test Automation

The image displays two side-by-side screenshots. The left screenshot shows an IDE (IntelliJ IDEA) with a Java test file named `checkLogin` in the `talabatest` package. The code defines a `LoginBox` class extending `BaseTest` with a `checkLogin()` method. The IDE interface includes a project structure on the left, a code editor in the center, and a run console at the bottom showing a successful test run for "Test2".

```
package talabatest;

import com.aventstack.extentreports.ExtentReports;
import com.aventstack.extentreports.ExtentTest;
import com.aventstack.extentreports.Status;
import io.appium.java_client.MobileElement;
import org.openqa.selenium.By;
import org.testng.Assert;
import org.testng.annotations.Test;

public class LoginBox extends BaseTest {

    @Test(testName = "Check Login Section when User is Guest")
    public void checkLogin(){
        System.out.println("Test2");

        ExtentTest test = extent.createTest( name: "Login Section", description: "This Case will show you that Log...
```

The right screenshot shows a mobile application interface with a search bar at the top and a map below. The map displays various locations, including "Abu Baker Al Sedeq Mosque" and "Al Ameer Grocery". The interface includes standard mobile navigation icons at the bottom.

Test Automation

The screenshot displays a test automation interface. On the left, a sidebar shows a list of tests under the heading 'Tests'. The selected test is 'Check Left-Hand Side Menu', which has a 'Pass' status and a duration of 00:00:20:286. The main area shows the test details for 'Check Left-Hand Side Menu', including a timestamp of 02.09.2022 10:21:19 AM and a test ID of #test-id=1. Below this, a table lists the test steps and their results:

STATUS	TIMESTAMP	DETAILS
Info	10:21:00 AM	User will Share his/her Location to Talabat App
Info	10:21:01 AM	User Device will allow for sharing his/her Location to Talabat App
Pass	10:21:10 AM	User will be directed to List of Places
Pass	10:21:11 AM	User is typing inside the SearchBox: 'Khaldia Circle'
Pass	10:21:12 AM	User will click on the wanted place result
Pass	10:21:15 AM	User is confirming for the place
Pass	10:21:17 AM	User is tapping on the Left-Hand Side Menu
Pass	10:21:19 AM	Checking the Menu Title
Pass	10:21:19 AM	Checking the Country name
Pass	10:21:19 AM	Checking the Home Tag
Pass	10:21:19 AM	Checking the Your orders Tag

In the bottom right corner, there is a notification from IntelliJ IDEA stating 'Tests Passed 1 passed'.
